

"FLET'S VPN Gate"

1. Outline of Services

- This is a new VPN service that, by connecting a customer's network and servers to the lines of "FLET'S VPN Gate" subscribers, achieves center-end communication between corporate customers and "FLET'S VPN Gate" subscribers.
- The service enables the easy construction of a private network with offices using "FLET'S Hikari Next", and is designed for businesses in communications business and other corporate customers.
- As an option function enabling use of "FLET'S VPN Gate" worry-free with greater security, the service offers a "line data forwarding function," which forwards the "customer ID*5-1, which is assigned to each "FLET'S Hikari Next" line, to a customer-authentication server.
- We also plan to offer "FLET'S VPN Wide," which will enable easy construction of a low-cost private network among "FLET'S Hikari Next" subscribers.

*5-1: A "customer ID" is a unique 13-character code starting with the letters CAF that is assigned to each "FLET'S Hikari Next" customer. It can be found on the "introduction to the start of communication" sent after subscribing.

5-2 In this format, connection with customer servers is made in the housing space of a building from where service is provided.

5-3 In this format, connection with customer servers is made inside the service area of a building from where service is provided..
