

5-2. Forecast for FY2011 (Capital Investment)

- Capital investment for FY2011 will equal the 410.0 billion yen envisioned prior to the earthquake, plus 20.0 billion yen for installing new air-conditioning equipment in exchange offices, full addressing power facilities equipment issues, and newly constructing alternative routes for severed relay transmission lines, for a total of 430.0 billion yen.
- In addition, demand-based full-fledged restoration investment, such as the laying of cables in parallel with the restoration pace of the affected areas will be addressed by reviewing the current process.
