

4. Full-fledged Restoration of Temporarily Restored Facilities (Relay Transmission Line)

- The relay transmission line that had been operated as a single route due to temporary restoration, has been restored to two routes. (Even when one of the relay transmission lines is disconnected by a secondary disaster, etc., the other route can be secured.)

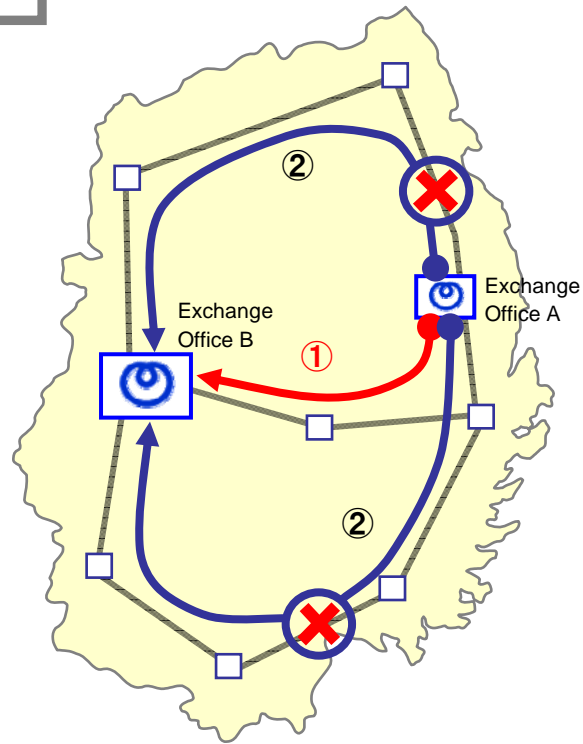

Miyagi

Recovered from single route operations to two operations by restoring relay cables.

Iwate

- ① Restored services to a single route by switching to a temporary route.
- ② Secured two routes by restoring relay cables.
