

NTT EAST Group's Approach to Sustainability

With a mission to connect people, communities, and society, the NTT EAST Group addresses local challenges and creates new value as an ICT company rooted in people's daily lives, leveraging its on-the-ground expertise and advanced technologies. We aim to fulfill our purpose of co-creating a regional circular society with local communities.

NTT EAST Group's
Sustainability

(In Japanese Only)

Leading social transformation by taking on new challenges

Realizing a Decarbonized, Circular Economy

- Achieving carbon neutrality by 2040
- Contributing to a net-zero society
- Contributing to the circular economy
- Expanding biodiversity conservation activities

Revitalizing Local Communities and Economies

- Addressing regional challenges and creating new value through close engagement with stakeholders
- Building a resilient society with community-focused engineering capabilities
- Delivering high-quality, reliable telecommunications services that support society and economic activity

Building a Society that Respects Diversity

- Ensuring respect for human rights throughout society
- Promoting diversity and inclusion
- Transforming work practices
- Creating a more equitable society
